PERSONAL PROJECTS

Race Game

- Simple simulation moto racing in Java using Threads.

Rent-A-Car

- Appliation in Java for managing rent a car agencies. Every potential user can log in or register by entering the required information. The client can choose the type of car rental that can be daily, weekly or weekend rentals. He chooses what kind of vehicle he wants to rent and the beginning and end of the rental date. An agency worker has the ability to log in and enter the type of vehicle their agency offers for rent, as well as change the list of vehicles. Information and data are stored in a database.

E-carton

- Application in Java for ordering medicines online like an online pharmacy. The application is affiliated with a hospital, so the application will have access to prescriptions and the user will be able to order these medicines for free. For orders over 500 rsd there will be free shipping. The application will be accessed by admin, doctors and patients. Doctor will be able to enter prescriptions for a particular patient. The patient will be able to create an order. Information and data are stored in a database.

WORK EXPERIENCE

Front-end developer
